

eTime provides a range of short ICT professional development courses for teachers. These courses are run at eTime and cover a wide variety of Macintosh and PC software. Teachers already have access to most of the applications used via their TELA laptops. Free or demo versions of the other software are available on the day.

The courses below include: Blogs, Wikis, Teaching Thinking using ICTs, GarageBand, iMovie 09 and Movie Maker. Please see the second page for information about each course including dates and times.

Take advantage of eTime's unique learning environment and upskill yourself with software that will help you to integrate ICT successfully into your teaching and learning.

These programmes offer teachers opportunities to:

- develop digital-age skills in a friendly, comfortable environment;
- gain 'hands on' experience with the latest in digital equipment and software;
- work within a context relevant to your school;
- create an exemplar of work for your school;
- meet and share practical ideas with others.

What to bring:

- Your TELA Laptop.
- You will need to have administrative rights to your computer in order to download any free software.

Please register by filling in the form below and then posting or faxing it to eTime.

Address: eTime, 17 Armagh St, Christchurch 8013 **Phone:** 03 366 9876 **Fax:** 03 366 9874 **Email:** office@etime.co.nz **Website:** www.etime.co.nz

Blogs (Mac or Windows)

18 March, 9am - 4.00pm
OR 4 May, 9am - 4.00pm

Give students a global audience using a blog.

Regular blogging fosters the development of writing and research skills. Blogging also supports digital literacy as students learn to critically assess and evaluate various online resources. In this workshop participants will set up a blog for their class and learn ways of managing and integrating online sharing into teaching and learning. Aspects of cyber safety and class acceptable-use policies will also be introduced as these are a vital part of integrating online sharing into classroom practice.

Cost **\$180 incl GST**

Wikis (Mac or Windows)

26 March, 9am - 4.00pm
OR 7 May, 9am - 4.00pm

Develop a free, easy and maintainable class website.

A class wiki is a great way to promote online collaboration and communication. They encourage creativity and contribution as a respectful, online citizen. Using a wiki, students can access school material from home and make comments on each others' work. Aspects of cybersafety and class acceptable-use policies will also be introduced as these are a vital part of integrating online sharing into classroom practice.

Cost **\$180 incl GST**

Garageband (Mac)

15 June, 9am - 4.00pm

Promote your students' creativity with GarageBand.

GarageBand is music software provided free with every Apple Mac computer. This workshop caters for all levels of confidence, in both musical and technical ability. Participants will learn how to compose royalty free music, add audio effects, and create audio and video podcasts. They will leave with ideas on how to use GarageBand to enhance critical and creative thinking, as well as create new learning opportunities for students.

Cost **\$180 incl GST**

Movie Making: Movie Maker (Windows)

20 April, 9am - 4.00pm
OR 5 July, 9am - 4.00pm

Promote critical and creative thinking with Movie Maker.

Lights, camera, action! Create a short movie using Windows Movie Maker. Participants will learn about storyboarding, effective filming techniques, importing and editing. Transitions, effects, music and voice overs will be added as short movies are created. Learn how to use Movie Maker to its full potential, and successfully integrate it into the school curriculum. Movie Maker is a Windows software application that comes free with Windows XP and Vista.

Cost **\$180 incl GST**

Movie Making: iMovie 09 (Mac)

16 April, 9am - 4.00pm
OR 30 June, 9am - 4.00pm

Promote critical and creative thinking with iMovie 09.

Gain the 'know-how' for creating impressive short movies using iMovie 09 for Mac. Participants will learn about storyboarding, effective filming techniques, importing and editing. Transitions, effects, music and voice overs will be added as short movies are created. Learn how to use iMovie to its full potential, and successfully integrate it into the school curriculum. Laptops will be provided for participants who don't have iMovie 09 on their TELA laptops.

Cost **\$180 incl GST**

Teaching Thinking using ICT (Mac or Windows)

26 April, 9am - 4.00pm
OR 29 June, 9am - 4.00pm

Promote creative and critical thinking through the use of ICT.

Learn how 21st Century tools can motivate and engage students to become effective thinkers. Using digital cameras and free software, participants will develop skills to encourage and motivate students to think more creatively and critically. Strategies will be shared to assist students in their decision making and problem solving skills. This workshop will provide teachers with practical activities to integrate thinking tools into their teaching and learning programmes. Teachers will need to bring a digital camera and their TELA laptop.
